Eaton

2-Post Rail Kit
RAIL KIT INSTALLATION

The 2-post rail kit includes:
• Two rails
• Sixteen truss-head 10-32 × 1/2” screws

Before installing the rail kit, you will need:
• A Phillips screwdriver

Installing the UPS Rail Kit

The following steps explain how to install the UPS rail kit.

1. Attach each rail to the rack post using the twelve supplied screws (truss-head 10-32 × 1/2”).
2. Lift the UPS and slide it into the rack.

3. Secure the front of the UPS to the rack using four truss-head screws.
   The UPS is now secured in the rack.
