---SAVE THESE INSTRUCTIONS---

IMPORTANT SAFETY INSTRUCTIONS!

WARNING: A WARNING alerts you to the possibility of serious injury or death if you do not follow the instructions.

CAUTION: A CAUTION alerts you to the possibility of damage or destruction of equipment if you do not follow the corresponding instructions.

WARNING: Failure to read, thoroughly understand, and follow all instructions can result in serious personal injury, damage to equipment, or voiding of factory warranty! It is the installer’s responsibility to make sure all components are properly assembled and installed using the instructions provided.

WARNING: Failure to provide adequate structural strength for this component can result in serious personal injury or damage to equipment! It is the installer’s responsibility to make sure the structure to which this component is attached can support five times the combined weight of all equipment. Reinforce the structure as required before installing the component. The wall to which the mount is being attached may have a maximum drywall thickness of 5/8" (1.6cm). Do not install drywall anchors into the seam between drywall pieces.

WARNING: Exceeding the weight capacity can result in serious personal injury or damage to equipment! It is the installer’s responsibility to make sure the combined weight of all components attached does not exceed 125 lbs (56.7 kg) for the RMF2 and RLF2 or 175 lbs (79.4 kg) for the RXF2. Use with products heavier than the maximum weight indicated may result in collapse of the mount and its accessories causing possible injury.

WARNING: Use this mounting system only for its intended use as described in these instructions. Do not use attachments not recommended by the manufacturer.

WARNING: Never operate this mounting system if it is damaged. Return the mounting system to a service center for examination and repair.

WARNING: Do not use this product outdoors.

IMPORTANT: The RMF2/RLF2/RXF2 mounts are designed to be mounted to an 8" concrete, 8" x 8" x 16" concrete block, or 2" x 4" wood studs (16" on center) wall.
DIMENSIONS - RXF2

TOOLS REQUIRED FOR INSTALLATION

1. 7/32" (5.5mm)
2. 5/16" (7.9mm)
3. 1/2" (12.7mm)
4. #2

PARTS

- A(1) [wall plate]
- B(2) [vertical bracket]
- C(4 or 6) 5/16 x 2 1/2"
- D(4 or 6) 5/16"
- E(4 or 6) [concrete anchor]

Hardware Bag

- FA(8) M4 x 16mm
- FE(6) M5 x 16mm
- FI(6) M6 x 16mm
- FL(6) M8 x 20mm
- FP(8) 1/4" (6.4mm)
- FB(6) M4 x 20mm
- FF(6) M5 x 20mm
- FJ(6) M6 x 25mm
- FM(6) M8 x 30mm
- FQ(8) 1/2" (12.7mm)
- FC(6) M4 x 25mm
- FG(6) M5 x 25mm
- FK(6) M6 x 35mm
- FN(6) M8 x 40mm
- FD(6) M4 x 35mm
- FH(6) M5 x 35mm
- FO(6) [universal washer] M8 x 50mm

For below kit, quantities are 4 for RMF2 and RLF2, 6 for RXF2

[RLF2 shown]
Assembly And Installation
Install Wall Plate to Wall - Wood Studs

**WARNING:** Failure to provide adequate structural strength for this component can result in serious personal injury or damage to equipment! It is the installer’s responsibility to make sure the structure to which this component is attached can support five times the combined weight of all equipment. Reinforce the structure as required before installing the component. The wall to which the mount is being attached may have a maximum drywall thickness of 5/8” (1.6cm). Do not install drywall anchors into the seam between drywall pieces.

1. Unfold wall plate (A) to prepare it for mounting to wall. (See Figure 1)

   ![Figure 1](image1)

2. Level wall plate (A) and mark locations of pilot holes. (See Figure 2)

   **NOTE:** The RMF2 must be installed on two 16” studs. The RLF2 can be installed on 16” studs (inner holes) or 24” studs (outer holes). For the RXF2, it can be mounted over two or three 16” studs or two 24” studs. If mounting to three 16” studs, it must be mounted to all three studs using the outer holes and center holes. (See Figures 2 and 3) All studs must be 2”x4”.

   **NOTE:** The vertical center of the display will be even with the center line indicated on the labels located directly below each hinge. Keep this in mind when determining mounting location. (See Figure 3)

3. Drill 7/32” (5.5mm) diameter pilot holes into wood studs at marked locations. (See Figure 2)

   ![Figure 2](image2)

4. Install 5/16 x 2 1/2” hex head cap screws (C) through four flat washers (D), wall plate (A) and into wood studs. (See Figure 4)

   ![Figure 3](image3)

   ![Figure 4](image4)
Install Wall Plate to Wall - Concrete or Concrete Block

**WARNING:** Failure to provide adequate structural strength for this component can result in serious personal injury or damage to equipment! It is the installer's responsibility to make sure the structure to which this component is attached can support five times the combined weight of all equipment. Reinforce the structure as required before installing the component. The wall to which the mount is being attached may have a maximum drywall thickness of 5/8" (1.6cm).

**WARNING:** ELECTRICAL SHOCK HAZARD! CUTTING OR DRILLING INTO ELECTRICAL CORDS OR CABLES CAN CAUSE DEATH OR SERIOUS PERSONAL INJURY! ALWAYS make certain area behind mounting surface is free of electrical wires and cables before drilling or installing fasteners.

**WARNING:** EXPLOSION AND FIRE HAZARD! CUTTING OR DRILLING INTO GAS PLUMBING CAN CAUSE DEATH OR SERIOUS PERSONAL INJURY! ALWAYS make certain area behind mounting surface is free of gas, water, waste, or any other plumbing before cutting, drilling, or installing fasteners.

1. Unfold wall plate (A) to prepare it for mounting to wall. (See Figure 1)
2. Level wall plate (A) and mark locations of pilot holes at desired mounting location. (See Figure 5)

**IMPORTANT ! :** The RMF2-RLF2-RXF2 mounts are designed to be mounted to 8" concrete or 8"x8"x16" concrete block.

**NOTE:** For the RLF2, either the inner or outer four holes may be used.

**NOTE:** For the RXF2, use the outer four holes and the two middle holes on wall plate for installation.

**NOTE:** The vertical center of the display will be even with the center line indicated on the labels located directly below each hinge. Keep this in mind when determining mounting location. (See Figure 5)

3. Drill 5/16" (8mm) diameter pilot holes into wall at marked locations. Holes must be drilled at least 3 1/4 inches deep. (See Figure 5)
4. Install four or six concrete anchors (E) into drilled holes. Use a hammer to tap anchors into holes. (See Figures 6 and 7)

**IMPORTANT ! :** The anchors must be installed through any wall covering until flush with the concrete wall. (See Figure 6)

5. Using 1/2" (12.7mm) wrench, install screws (C) through flat washers (D), wall plate (A) and into concrete anchors (E). (See Figure 7)
Install Brackets to Display

**WARNING:** The minimum hole pattern size is 100mm x 100mm for the RMF2 and 200mm x 200mm for the RLF2 and the RXF2.

1. Lay display face down on protective surface.

**CAUTION:** Using screws of improper diameter may damage your display! Proper screws will easily thread into display mounting holes.

2. Select screw diameter by examining hardware (FA-FO) (8mm, 6mm, 5mm, or 4mm) and comparing with mounting holes on display. (See Figure 8)

3. Select spacers: (See Figure 8)
   - If mounting holes are not recessed and both brackets (B) can lay flat against display, then no spacers are required.
   - If mounting holes are recessed, or if protrusions prevent brackets (B) from laying flat, then spacers (FP or FQ) must be used.
   - If additional depth is needed behind display, spacers (FP and FQ) can be stacked on top of each other.

**CAUTION:** Using screws of improper length may damage your display! Proper screws will have adequate thread engagement without contacting bottom of display mounting holes.

**IMPORTANT !:** The M8 screws do NOT require a washer. Use the universal washer (FS) ONLY with M4, M5 and M6 screws.

4. Select screw length: (See Figure 8)
   - Using your hand, insert SHORTEST length screw of selected diameter (FA, FE, FI or FL) through bracket (B), universal washer (FS, if required), selected spacer (FP or FQ, if required), into display mounting hole. Do NOT thread screw into hole at this time.
   - Proper screw length requires base of screw head to protrude above flat washer a distance equal to or greater than the screw diameter. If screw length is inadequate, select longer screw. Select shortest screw which will protrude the required distance.

5. Place brackets (B) on display, ensuring: (See Figure 8)
   - Upper hooks are towards top of display.
   - Center of brackets (B) are as close to the center of the back of display as possible after being installed. Center of bracket is indicated by the diamond-shaped hole.

6. Using Phillips screwdriver, carefully install selected screws through universal washers (FS, if required), brackets (B), and spacers (FP or FQ, if required), into display. (See Figure 8)

7. Tighten all screws. Ensure all applicable display mounting holes (4, 6, or 8) are used.
Install Display to Wall Plate

**WARNING:** Exceeding the weight capacity can result in serious personal injury or damage to equipment! It is the installer’s responsibility to make sure the combined weight of all components attached does not exceed 125 lbs (56.7 kg) for the RMF2 and RLF2 or 175 lbs (79.4 kg) for the RXF2. Use with products heavier than the maximum weight indicated may result in collapse of the mount and its accessories causing possible injury.

**WARNING:** Display may be very heavy! Ensure display can be safely lifted and maneuvered as required to install on wall plate. Failure to take adequate precautions can result in serious personal injury or damage to equipment!

**WARNING:** Interface brackets must be hung on opposite sides of the center tab on wall plate! (See Figure 9)

![Figure 9](image)

**Figure 9**

1. Make sure interface brackets are in the kickstand position by pulling down on handles as far as possible. (See Figure 10)

2. Hang display with brackets (B) on upper rail of wall plate (A). Kickstand should be engaged with lower portion of wall plate. (See Figure 10)

**NOTE:** Any cable management or rear display adjustments should be made when the display is resting on the kickstand.

![Figure 10](image)

(view from left side)
3. Unlock kickstand by pushing up on interface brackets until kickstand rests against the wall. (See Figure 11)

4. Push up on the interface brackets further in order to lock display into position against wall. (See Figure 11)

5. Straps can be tucked behind display on notch on interface brackets (B) after installation is complete so that they will not be visible to the viewer. (See Figure 9)

6. (Optional) Route padlock or cable lock (not included) through bottom holes on interface bracket to provide additional security. (See Figure 11)
