Class A EMC Statements

FCC Part 15

**NOTE**

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

**ICES-003**

This Class A Interference Causing Equipment meets all requirements of the Canadian Interference Causing Equipment Regulations ICES-003.

Cet appareil numerique de la classe A respecte toutes les exigences du Reglement sur le materiel brouilleur du Canada.

**IEC 62040-2**

Some configurations are classified under IEC 62040-2 as “C2 UPS for Unrestricted Sales Distribution.”
Special Symbols

The following are examples of symbols used on the UPS or accessories to alert you to important information:

**RISK OF ELECTRIC SHOCK** Observe the warning associated with the risk of electric shock symbol.

![Symbol](image)

**CAUTION: REFER TO OPERATOR’S MANUAL** - Refer to your operator’s manual for additional information, such as important operating and maintenance instructions.

This symbol indicates that you should not discard the UPS or the UPS batteries in the trash. This product contains sealed, lead-acid batteries and must be disposed of properly. For more information, contact your local recycling/reuse or hazardous waste center.

![Symbol](image)

This symbol indicates that you should not discard waste electrical or electronic equipment (WEEE) in the trash. For proper disposal, contact your local recycling/reuse or hazardous waste center.

![Symbol](image)

**ON** - Indicates that the switch is in the ON position.

**OFF** - Indicates that the switch is in the OFF position.

**PHASE** - The word “phase.”

---

**IMPORTANT**

To ensure you have the most up-to-date content and information for this product, please review the latest manual revision on our website, [www.eaton.com/9355](http://www.eaton.com/9355).
EATON
END-USER LICENSE AGREEMENT

IMPORTANT, READ CAREFULLY. THIS END USER LICENSE AGREEMENT (THE “AGREEMENT”) IS A BINDING CONTRACT BETWEEN YOU, THE END-USER (THE “LICENSEE”), AND EATON CORPORATION, ITS AFFILIATES (EATON” OR “LICENSED PROGRAMS”), BY OPERATING THIS UNINTERRUPTIBLE POWER SUPPLY (UPS) PRODUCT INCLUDING SOFTWARE EMBEDED IN IT (“FIRMWARE”), YOU, THE LICENSEE, ARE AGREEING TO BE BOUND BY THE TERMS, CONDITIONS, AND LIMITATIONS OF THIS AGREEMENT. READ THE TERMS AND CONDITIONS OF THIS AGREEMENT CAREFULLY BEFORE, INSTALLING OR OPERATING THE PRODUCT, IF YOU DO NOT AGREE TO THESE TERMS OF THIS AGREEMENT, PROMPTLY RETURN THE UNUSED PRODUCT TO EATON.

1.0 DEFINITIONS
1.1 Documentation. “Documentation” means the user guides and manuals for the installation and use of the UPS, whether made available over the internet, provided in CD-ROM, DVD, hard copy or other form.
1.2 “Firmware” means software programs that are embedded in the product for which Licensee is granted a license hereunder, the Documentation therefore and, to the extent available, Updates thereto. The Firmware is licensed hereunder in object code (machine-readable) form only except that certain software programs may include limited portions in source code (human-readable) form.
1.3 Update. “Update” means a subsequent release of the Firmware, if and when developed by Eaton. An Update does not include any release, new version, option, or future product, which Eaton licenses separately.

2.0 Firmware License
2.1 Ownership. Eaton or its third party licensors retain all title, copyright and other proprietary rights in, and ownership of the Firmware regardless of the media upon which the original or any copy thereof is embodied or fixed.
2.2 License Grant. Eaton grants to Licensee a limited, non-exclusive, non-assignable license hereunder in object code form to operate the Firmware for the life of the Licensee or the Licensee’s representative in the ordinary course of Licensee’s business. Licensee may install, use, update, repair, or modify the Firmware in accordance with the instructions and as directed by Eaton. Licensee shall not resell, assign, lease, sublicense, encumber, or otherwise transfer its interest in the Firmware or in the Documentation, or in anyUpdates thereto. The Firmware is licensed hereunder in object code (machine-readable) form only except that certain software programs may include limited portions in source code (human-readable) form.
2.3 Restrictions and Requirements. Licensee will not, nor will it permit others to, modify, adapt, translate, reverse engineer, decompile, or disassemble the Firmware or any component thereof (including the Documentation), or create derivative works based on the Firmware (including the Documentation), except to the extent such forgoing restriction is prohibited by applicable law or applicable open source license to, and only to, any open source software component that is incorporated into the Firmware (if any). Copyright laws and international treaties protect the Firmware, the Documentation, and any part thereof; expressly prohibited. For avoidance of doubt, Eaton does not grant Licensee a license to any of Eaton’s brands, logos, designs, trade dress, secrets, trade names, or trade names, in whole or in part.
2.4 Transfer and Assignment Restrictions. Licensee will not sell, resell, assign, lease, sublicense, encumber, or otherwise transfer its interest in the Firmware or in the Documentation, or in anyUpdates thereto. The Firmware is licensed hereunder in object code (machine-readable) form only except that certain software programs may include limited portions in source code (human-readable) form.
2.5 Termination. This Agreement and the license granted hereunder automatically terminates in the event that Licensee fails to comply with any provision of this Agreement. Eaton may terminate this license at any time with or without cause.
2.6 Effect of Termination. Immediately upon termination of this Agreement or the license granted hereunder, Licensee will cease using the product. The parties’ rights and obligations under the remaining provisions of this Agreement shall survive termination of this Agreement: Article 1, Section 2.1, Section 2.2, Section 2.4, Article 3.0 and Article 5.0.

4.0 INFRINGEMENT AND WARRANTIES
4.1 Indemnity. In the event of any demand, allegation, or indication that the UPS with its firmware infringes or misappropriation any third party intellectual property rights (including, but not limited to any patent, copyright, trademark, trade dress, or trade secret (“Intellectual Property Claim”)), Licensee will notify Eaton promptly of such claim. Eaton may, in its sole discretion, assume the defense and settlement of said Intellectual Property Claim and Licensee will provide reasonable assistance and assistance to Eaton for the defense of such claim.
4.2 Disclaimer of Warranties. THE Firmware IS PROVIDED “AS IS” WITHOUT WARRANTY OF ANY KIND. EATON DOES NOT WARRANT THAT THE FIRMWARE WILL BE ERROR-FREE OR SECURE FROM UNAUTHORIZED ACCESS. THE LICENSEE EXPRESSLY ACKNOWLEDGES THAT TO THE EXTENT PERMITTED BY APPLICABLE LAW, THE USE OF THE PRODUCT IS AT LICENSEE’S SOLE RISK.

5.0 GENERAL PROVISIONS
5.1 Notice of Changes. Licensee acknowledges that, from time to time, but has no obligation to, create Updates of the Firmware or components thereof.
5.2 Limitation of Liability. NOTWITHSTANDING ANY PROVISION OF THIS AGREEMENT TO THE CONTRARY, LICENSEE EXPRESSLY UNDERSTANDS AND AGREES THAT EATON AND ITS LICENSORS, WILL NOT BE LIABLE FOR, (A) ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, CONSEQUENTIAL OR EXEMPLARY DAMAGES WHICH MAY BE INCURRED BY LICENSEE OR ANY THIRD PARTY, HOWEVER CAUSED AND UNDER ANY THEORY OF LIABILITY. THIS WILL INCLUDE, BUT NOT LIMITED TO, ANY LOSS OF PROFIT (WHETHER INCURRED DIRECTLY OR INDIRECTLY), LOSS OF GOODWILL OR BUSINESS REPUTATION, ANY LOSS OF DATA SUFFERED, COST OF PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES, OR OTHER DIRECT, INDIRECT, OR CONSEQUENTIAL DAMAGES OF ANY KIND (INCLUDING, WITHOUT LIMITATION LOST PROFITS, LOSS OF DATA, OR OTHER INJURY) EVEN IF EATON CORPORATION, ITS AFFILIATES OR ANY THIRD PARTY LICENSOR HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.
5.3 Notices. All notices required to be sent hereunder will be in writing and will be deemed to have been given when mailed by first class mail to the address shown below:

PLEASE NOTICE OF LICENSEE

EATON Open Source Components
Eaton Protection Limited
30 Parnell Road
Dublin 4, Co. Dublin, Ireland

5.4 Severability. If any provision of this Agreement is held to be invalid or unenforceable, the remaining provisions of this Agreement will remain in full force.
5.5 Waiver. The waiver by either party of any default or breach of this Agreement will not constitute a waiver of any other subsequent default or breach. Failure to enforce delay in enforcing any provision of this Agreement will not constitute a waiver of any rights under any provisions of this Agreement.

5.6 Entire Agreement. This Agreement constitutes the complete agreement between the parties and supersedes all prior or contemporaneous agreements in relation or oral, concerning the subject matter of this Agreement. This Agreement may not be modified or amended except in a writing signed by a duly authorized representative of each party. A copy of this Agreement will bind to the parties English than included in the Firmware or Documentation, it is included for convenience and the English language version of this Agreement will be supplemental to those in the additional agreements, to the extent not inconsistent with the additional agreements. If a copy of this Agreement is translated to a parties English than included in the Firmware or Documentation, it is included for convenience and the English language version of this Agreement will be supplemental to those in the additional agreements, to the extent not inconsistent with the additional agreements.

5.7 Heirs, Successors, and Assigns. Each and all of the covenants, terms, provisions and agreements herein contained will be binding upon and to the benefit of the parties hereto and, to the extent expressly permitted by this Agreement, their respective heirs, legal representatives, successors and assigns.

5.8 Export Restrictions. Licensee agrees to comply fully with all relevant export laws and regulations of the United States and all other countries in the world (the “Export Laws”) to assure that neither the Firmware nor any direct product thereof are (i) exported, directly or indirectly, in violation of Export Laws; or (ii) are intended to be used for any purposes prohibited by the Export Laws. Without limiting the foregoing, Licensee will not export or re-export the Firmware: (i) to any country to which the U.S. has embargoed or restricted the export of goods or services (see http://www.treasury.gov/resource-center/programs/ProcessedPrograms.aspx), or to any national of any such country, wherever located, who intends to transmit or transport the Firmware back to such country; (ii) to any end user who Licensee knows or has reason to know will utilize the Firmware in the design, development or production of nuclear, chemical or biological weapons; or (iii) to any end user who has been prohibited from participating in U.S. export transactions by any federal agency of the U.S. government.

EATON END-USER LICENSE AGREEMENT
IMPORTANT, READ CAREFULLY. THIS END USER LICENSE AGREEMENT (THE “AGREEMENT”) IS A BINDING CONTRACT BETWEEN YOU, THE END-USER (THE “LICENSEE”), AND EATON CORPORATION, ITS AFFILIATES (EATON” OR “LICENSED PROGRAMS”), BY OPERATING THIS UNINTERRUPTIBLE POWER SUPPLY (UPS) PRODUCT INCLUDING SOFTWARE EMBEDED IN IT (“FIRMWARE”), YOU, THE LICENSEE, ARE AGREEING TO BE BOUND BY THE TERMS, CONDITIONS, AND LIMITATIONS OF THIS AGREEMENT. READ THE TERMS AND CONDITIONS OF THIS AGREEMENT CAREFULLY BEFORE, INSTALLING OR OPERATING THE PRODUCT, IF YOU DO NOT AGREE TO THESE TERMS OF THIS AGREEMENT, PROMPTLY RETURN THE UNUSED PRODUCT TO EATON.

5.9 U.S. Government Restricted Rights. The Firmware is a “commercial item” as that term is defined at 48 C.F.R. § 2.101, consisting of “commercial computer software” and “commercial computer software documentation”, as such terms are used in 48 C.F.R. §§ 227.7202-1 and 227.7202-4; and the U.S. Government End Users acquire the Firmware any those rights as identified in the license agreements that Eaton Corporation, 1000 Eaton Boulevard, Cleveland, Ohio 44122.

5.10 Third Party Intellectual Property Rights. The Firmware may contain components including open source software by third parties (“Third Party Licensors”) and are provided with, incorporated into, or embedded in, the Firmware pursuant to license arrangements between Eaton and such third parties. Third Party Licensor components in the Firmware are not licensed or warranted under the terms of this document, but are instead subject to the Third Party Licensor’s license agreements. Licensee will not modify, deinstall, or obliterate any copyright or other proprietary rights notices of Third Party Licensors contained in the Firmware.

5.11 Indemnity. Licensee shall defend, indemnify and hold Eaton and its officers, directors, employees, and agents harmless from and against all losses, damages, liabilities, claims, actions, and associated costs and expenses (including reasonable attorneys’ fees and expenses) arising out of or in connection with any breach of this Agreement.

5.12 Open Source Software. The Firmware may contain certain components owned by Eaton that are provided with, incorporated into, or embedded in, the Firmware that are subject to third party open source license (“Eaton Open Source Components”). Eaton Open Source Components are subject to the open source licenses corresponding to the particular software component. To the extent there are any conflicts between the terms of this Agreement and the terms of any open source license governing Eaton Open Source Components or additional obligations by such open source licenses, Eaton Open Source Components will control.

5.13 Confidentiality. Licensee acknowledges that confidential aspects of the Firmware (including any proprietary source code) are a trade secret of Eaton, the disclosure of which would cause substantial harm to Eaton that could not be remedied by the payment of damages alone and such confidential aspects of the Firmware shall not be disclosed to third parties without the prior written consent of Eaton. Accordingly, Eaton will be entitled to preliminary and permanent injunctions and other equitable relief for any breach of this Section 5.13.

5.14 Note on Java Support. The Firmware may contain support for programs written in Java. JAVA technology is not fault tolerant and is not designed or intended for use as online control equipment in hazardous environments requiring fail-safe performance, such as in the operation of nuclear facilities, aircraft navigation or communications systems, air traffic control, direct life support machines, or weapons systems, in which the failure of JAVA technology could lead to death, personal injury, or damage to property. JAVE technology is not fault tolerant and is not designed or intended for use as online control equipment in hazardous environments requiring fail-safe performance, such as in the operation of nuclear facilities, aircraft navigation or communications systems, air traffic control, direct life support machines, or weapons systems.

5.15 Governing Law. This Agreement will be interpreted and enforced in accordance with the laws of Ireland, without regard to choice of law principles. Any action arising out of or in connection with this Agreement shall be brought in the Courts of Ireland, unless mandatory law imposes otherwise.

Chapter 1  Introduction

A Tie Cabinet can be installed as a wall-mounted bypass or to provide support for a parallel system for redundancy or extra capacity.

A wall-mounted bypass switch is used to bypass the UPS during maintenance or servicing, providing wrap-around bypass for UPS service without shutting down the load.

A parallel (load sharing) system provides more capacity than a single UPS and can provide backup, depending on the load and configuration. In addition, when one UPS is taken out of service for maintenance or is not operating properly, a redundant UPS continues to supply uninterrupted power to the critical load. A parallel Powerware® Hot Sync Controller Area Network Bridge Card provides connectivity for system metering and operational mode control. The parallel system consists of two to four UPSs, each with a parallel CAN Bridge Card and a parallel cabinet.

Figure 1 shows the Eaton® 9355 UPS.

Figure 1. The Eaton 9355 UPS
Introduction
Chapter 2 Safety Warnings

IMPORTANT SAFETY INSTRUCTIONS SAVE THESE INSTRUCTIONS

This manual contains important instructions that you should follow during installation and maintenance of the UPS and batteries. Please read all instructions before operating the equipment and save this manual for future reference.

⚠️ DANGER

This UPS contains LETHAL VOLTAGES. All repairs and service should be performed by AUTHORIZED SERVICE PERSONNEL ONLY. There are NO USER SERVICEABLE PARTS inside the UPS.

⚠️ WARNING

- This UPS contains its own energy source (batteries). The UPS output may carry live voltage even when the UPS is not connected to an AC supply.
- To reduce the risk of fire or electric shock, install this UPS in a temperature and humidity controlled, indoor environment, free of conductive contaminants. Ambient temperature must not exceed 40°C (104°F). Do not operate near water or excessive humidity (95% maximum).
- To reduce the risk of fire, connect only to a circuit provided with 125 amperes maximum branch circuit overcurrent protection in accordance with the National Electrical Code® (NEC®), ANSI/NFPA 70.
- Output overcurrent protection and disconnect switch must be provided by others.

⚠️ CAUTION

- Batteries can present a risk of electrical shock or burn from high short circuit current. Observe proper precautions. Servicing should be performed by qualified service personnel knowledgeable of batteries and required precautions. Keep unauthorized personnel away from batteries.
- Proper disposal of batteries is required. Refer to your local codes for disposal requirements.
- Never dispose of batteries in a fire. Batteries may explode when exposed to flame.

CONSIGNES DE SÉCURITÉ IMPORTANTES – CONSERVER CES INSTRUCTIONS

Ce manuel comporte des instructions importantes que vous êtes invité à suivre lors de toute procédure d’installation et de maintenance des batteries et de l’onduleur. Veuillez consulter entièrement ces instructions avant de faire fonctionner l’équipement et conserver ce manuel afin de pouvoir vous y reporter ultérieurement.

⚠️ DANGER!

Cet onduleur contient des TENSIONS MORTELLES. Toute opération d’entretien et de réparation doit être EXCLUSIVEMENT CONFIÉE A UN PERSONNEL QUALIFIÉ AGREE. AUCUNE PIÈCE RÉPARABLE PAR L’UTILISATEUR ne se trouve dans l’onduleur.
**AVERTISSEMENT!**

- Cette onduleur possède sa propre source d'alimentation (batteries). Il est possible que la sortie de l'onduleur soit sous tension même lorsque l'onduleur n’est pas connectée à une alimentation CA.
- Pour réduire les risques d’incendie et de décharge électrique, installer l’onduleur uniquement à l’intérieur, dans un lieu dépourvu de matériaux conducteurs, où la température et l’humidité ambiantes sont contrôlées. La température ambiante ne doit pas dépasser 40 °C. Ne pas utiliser à proximité d’eau ou dans une atmosphère excessivement humide (95 % maximum).
- Afin de réduire les risques d’incendie, n’effectuez le raccordement qu’avec un circuit muni d’une protection de surintensité du circuit de dérivation maximum de 125 ampères conformément au Code Électrique National (National Electrical Code) des États-Unis ANSI/NFPA 70.
- La protection de surintensité de sortie ainsi que le sectionneur doivent être fournis par des tiers.

**ATTENTION!**

- Les batteries peuvent présenter un risque de choc électrique ou de brûlure provenant d’un courant de court-circuit haute intensité. Observez les précautions appropriées. L’entretien doit être réalisé par du personnel qualifié connaissant bien les batteries et les précautions nécessaires. N’autorisez aucun personnel non qualifié à manipuler les batteries.
- Une mise au rebut réglementaire des batteries est obligatoire. Consulter les règlements en vigueur dans votre localité.
- Ne jamais jeter les batteries au feu. L’exposition aux flammes risque de les faire exploser.

**INSTRUCCIONES DE SEGURIDAD IMPORTANTES — GUARDE ESTAS INSTRUCCIONES**

Este manual contiene instrucciones importantes que debe seguir durante la instalación y el mantenimiento del SIE y de las baterías. Por favor, lea todas las instrucciones antes de poner en funcionamiento el equipo y guarde este manual para referencia en el futuro.

**PELIGRO**

Este SIE contiene VOLTAJES MORTALES. Todas las reparaciones y el servicio técnico deben ser efectuados SOLAMENTE POR PERSONAL DE SERVICIO TÉCNICO AUTORIZADO. No hay NINGUNA PARTE QUE EL USUARIO PUEDA REPARAR dentro del SIE.
ADVERTENCIA

• Este SIE contiene su propia fuente de energía (baterías). La salida del SIE puede transportar voltaje activo aun cuando el SIE no esté conectado con una fuente de CA.

• Para reducir el riesgo de incendio o de choque eléctrico, instale este SIE en un lugar cubierto, con temperatura y humedad controladas, libre de contaminantes conductores. La temperatura ambiente no debe exceder los 40°C. No trabaje cerca del agua o con humedad excesiva (95% máximo).

• Para reducir el riesgo de incendio, realice la conexión únicamente hacia un circuito que cuente con un máximo de 125 amperios de protección contra sobrecorriente de circuito derivado, de acuerdo con el Código Eléctrico Nacional, ANSI/NFPA 70.

• La protección contra sobrecorriente de salida y el conmutador de desconexión debe suministrarse por parte de terceros.

PRECAUCIÓN

• Las baterías pueden constituir un riesgo de descarga eléctrica o quemaduras por corriente alta de corto circuito. Adopte las precauciones debidas. Personal calificado de servicio que conozca de baterías y esté al tanto de las precauciones requeridas debe darle servicio al equipo. Mantenga al personal no autorizado alejado de las baterías.

• Es necesario desechar las baterías de un modo adecuado. Consulte las normas locales para conocer los requisitos pertinentes.

• Nunca deseche las baterías en el fuego. Las baterías pueden explotar si se las expone a la llama.
Chapter 3  Tie Cabinet Installation

The Eaton 9355 UPS has the following power connections:

- 3-phase (L1, L2, and L3), neutral, and ground connection for rectifier/bypass input
- 3-phase (L1, L2, and L3), neutral, and ground connection for load output

The nominal input/output voltages are:

- 120/208 or 127/220 Vac

Output overcurrent protection and disconnect switch must be provided by others.

Figure 9, Figure 10, Figure 12 and Figure 13 show the oneline diagrams.

**WARNING**

Only qualified service personnel (such as a licensed electrician) should perform the UPS installation and initial startup. Risk of electrical shock.

To hardwire the Tie Cabinet:

1. Verify that the electrical connections to the installation site have been properly installed.
2. A wall-mounted, user–supplied, readily–accessible disconnection device must be incorporated in the input wiring.
   
   Compare the circuit breaker ratings to the ones in Table 1.

   **NOTE**  
   To accommodate the feature of easy system expandability, it is recommended that initial installation of the Eaton 9355 UPS contain wiring to support the maximum capacity of the UPS cabinet.

3. Switch off utility power to the distribution point where the Tie Cabinet and UPSs will be connected. Be absolutely sure there is no power.
4. Determine your equipment’s grounding requirements according to your local electrical code.
5. Remove the Tie Cabinet front cover rails (see Figure 2).
6. Remove the cover panel to gain access to the breakers (see Figure 3).

Figure 3. Cover Panel
7. Punch holes for the conduit (AC input, UPS output, load connection, and maintenance bypass contact wires) using a Greenlee® punch or similar device.

8. Verify that the Tie Cabinet bypass breaker is in the OFF position (see Figure 4).

Figure 4. Tie Cabinet Bypass Breaker

9. Mount the Tie Cabinet to the wall and install the conduit.

10. Remove the UPS front door.

11. Verify that the UPS input circuit breaker is in the OFF position (see Figure 5).

12. Verify that the UPS battery circuit breaker is in the OFF position.

13. If you ordered the UPS with the optional output circuit breaker, verify that the output circuit breaker is in the OFF position.

14. Remove the UPS wiring access cover and retain.
15. Remove the UPS conduit landing box from the rear panel and retain.
16. Punch two holes in the conduit landing box for the input and output conduit using a Greenlee punch or similar device.
17. Route the wiring from the back of the UPS, through the wiring tray, to the front of the UPS.
18. Hardwire the UPS input terminations.

See Table 1 for specifications and Figure 6 for a detailed view of the UPS terminal block.

NOTE 1  Input neutral must be wired for proper operation or the UPS will not start.

NOTE 2  The Eaton 9355 UPS is shipped as a single-feed UPS and can be converted to a dual-feed UPS in the field.

NOTE 3  DO NOT overtighten the screws; be sure to use the specified tightening torque values shown in Table 1.

---

1 Use only 90°C-rated copper wire. Minimum wire size is based on 120/208 full load ratings applied to NEC Code Table 310-16. Code may require a larger AWG size than shown in this table because of temperature, number of conductors in the conduit, or long service runs. Follow local requirements.

2 Per NEC article 300-20(a), all three-phase conductors must be run in the same conduit. Neutral and ground must be run in the same conduit as the phase conductors.

3 Conduit is sized to accommodate one neutral conductor the same size as the phase conductor and one ground conductor. If two neutral conductors or an oversized neutral conductor are to be installed, check the size of the conduit needed to accommodate the extra wire or size and use that conduit size in place of the conduit size listed. Conduit sizes were chosen from NEC Table C1, type letters RHH, RHW, RHW–2, TW, THW, THHW, THW–2. 
NOTE 1  The two input neutral terminals are jumpered together; use either one of these terminals to make the input neutral connection.

NOTE 2  The two output neutral terminals are jumpered together; use either one of these terminals to make the output neutral connection.

19. Hardwire the output terminations from the UPS to the Tie Cabinet (see Figure 7).

20. Repeat Step 10 through Step 19 for each UPS.
21. Hardwire the load to the Tie Cabinet (see Figure 8).
22. Wire the maintenance bypass auxiliary contacts and terminate to the maintenance bypass wires in the Tie Cabinet (see Figure 6).
Connect the black and the red wire to TB4 on the UPS (see Figure 9 or Figure 10). Cap the blue wire.

**NOTE 1**  The maintenance bypass contacts are normally-open. To ensure proper bypass operation, DO NOT use the blue wire (it is normally-closed).

**NOTE 2**  There are two sets of maintenance bypass wires; you can terminate to either set. If you are installing four UPSs, it is recommended to terminate two UPSs to one set of wires and two UPSs to the other set of wires.

23. Reinstall the UPS wiring access cover removed in Step 14.
24. Reinstall the UPS conduit landing box in the reversed position (removed in Step 15).

**Figure 9. Parallel Wiring Diagram – without Maintenance Isolation Switch (MIS)**

**Figure 10. Parallel Wiring Diagram – with MIS**
25. Reinstall the UPS front door removed in Step 10.
26. Wire the AC input to the bypass breaker (see Figure 11).

**Figure 11. Bypass AC Input Wiring**

27. Verify the phase rotation for each UPS and the bypass input.
28. Reinstall the Tie Cabinet cover panel removed in Step 6.
29. Reinstall the Tie Cabinet front cover rails removed in Step 5.
30. Proceed to Chapter 4 Installing Options to continue the installation process.
Figure 12. Parallel UPS System and Tie Cabinet without MIS (Single-Feed, 208V or 220V Input: 208V or 220V Output)
Figure 13. Parallel UPS System and Tie Cabinet with MIS (Single-Feed, 208V or 220V Input : 208V or 220V Output)
Chapter 4 Installing Options

This section describes the Powerware Hot Sync Controller Area Network Bridge Card.

For other options, such as additional X-Slot® cards, LanSafe® Power Management Software, remote emergency power-off (REPO), relay output contacts, or programmable signal inputs, refer to the Eaton 9355 UPS (20/30 kVA) User’s Guide.

Figure 14 shows the location of the communication options and control terminals on the UPS.

Figure 14. Communication Options and Control Terminals

4.1 Powerware Hot Sync CAN Bridge Card

The Powerware Hot Sync CAN Bridge Card, shown in Figure 15, can be installed to provide connectivity for operational mode control and metering of a parallel system at any UPS in the system.

Figure 15. Powerware Hot Sync CAN Bridge Card
To install the Powerware Hot Sync CAN Bridge Card:

1. Remove the UPS front door.

2. Remove the communication wiring access plate from the UPS rear panel and punch a hole in it using a Greenlee punch or similar device (see Figure 16).

3. Install conduit for the communication wiring.

**Figure 16. Communication Wiring Access**

4. Set the jumper pins on the Powerware Hot Sync CAN Bridge Card according to the parallel configuration (see Figure 17):
   - If only two UPSs are paralleled, then set both cards to Pins 1 and 2.
   - For three or four paralleled UPSs, set the cards of the first and last UPSs to Pins 1 and 2; set the cards for the middle UPSs to Pins 2 and 3.
5. Install the CAN Bridge Card into X-Slot 2 (see Figure 14 and Figure 19).

6. Strip shielded, four-wire, twisted-pair wire (maximum 18 AWG recommended) for CAN Bridge Card wiring and pull-chain wiring.

7. Repeat Step 1 through Step 6 for each UPS.

8. Route the wiring through the conduit from the communication wiring access plate to the opening between the two X-Slot communication bays on each UPS (see Figure 18).

9. Install the CAN Bridge Card wiring between each UPS (see Figure 20 on Figure 20).
Installing Options

Use three wires of the four-wire twisted-pair wire. Reserve two wires for pull-chain wiring in Step 11. Be sure to check correct polarity for Pins 8 and 9:

- Connect SHIELD Pin 10 on all cards together.
- Connect CAN H Pin 9 and CAN L Pin 8 (twisted pair) on all cards together.

10. Route the pull-chain wiring through the middle of the fan section and secure in the cable clips for each UPS (see Figure 19).

**Figure 19. Installing Communication Cables**

11. Wire the pull-chain wiring to Signal Input 2 on each UPS and daisy chain the wiring to each UPS as shown in Figure 20. Be sure to check correct polarity:

- Connect Pull-Chain Output Contact Pin 1 to Signal Input 2 Pin 1 on each UPS.
- Connect Pull-Chain Output Contact Pin 2 to Signal Input 2 Pin 2 on each UPS.
CAUTION

If polarity or wiring is not correct, the parallel system does not operate normally. For example, when shutting down one UPS, the remaining UPS transfers the load to bypass instead of supporting the load. Verify all CAN Bridge Card wiring is correct for proper operation.

NOTE

Signal Input 2 can still be used for building alarms; it is automatically rerouted to the CAN Bridge Card.

12. Reinstall the communication wiring access plate on each UPS (removed in Step 2).

13. Replace the UPS front door on each UPS (removed in Step 1).

Chapter 5  Service and Support

If you have any questions or problems with the UPS, call your **Local Distributor** or the **Help Desk** at one of the following telephone numbers and ask for a UPS technical representative.

United States: 1-800-843-9433  
Canada: 1-800-461-9166 ext 260  
All other countries: Call your local service representative

Please have the following information ready when you call for service:

- Model number
- Serial number
- Firmware version number
- Date of failure or problem
- Symptoms of failure or problem
- Customer return address and contact information
Chapter 6  Warranty

For warranty information, please refer to the Resources link on our website, www.eaton.com/9355.
