Eaton 9130 UPS Honored with *INTERNET TELEPHONY*'s 11th Annual Product of the Year Award

January 12, 2009 ... Eaton is pleased to announce that its Eaton 9130 uninterruptible power system (UPS), which helps Information Technology (IT) managers carry out green initiatives, has just been awarded the prestigious 2008 Product of the Year Award from *INTERNET TELEPHONY* magazine. Designed to meet the dynamic demands of Internet Protocol (IP) communications, the new 700 to 3000 VA UPS models feature a high-efficiency design that saves energy without sacrificing reliability.

"Eaton has proven it is committed to quality and excellence while addressing real needs in the marketplace," said Rich Tehrani, TMC president and editor-in-chief of *INTERNET TELEPHONY* magazine. "We're proud to honor their accomplishments in the advancement of IP communications and look forward to more innovative solutions from them in the future."

"We're very pleased that our latest power protection solution has been recognized by this influential publication," said Hervé Tardy, vice president and general manager, Eaton Distributed Power Quality Business Unit. "Customers will find the Eaton 9130 to be one of the most energy intelligent UPSs on the market today that not only offers smart and cost-saving energy management, but also provides the highest level of power protection that today's IP communications require."

The editors of *INTERNET TELEPHONY* selected the companies, which in their view demonstrate the vision, leadership and attention to detail that are the hallmarks of the prestigious Product of the Year Award. Recipients of the award represent the most innovative new products as selected by *INTERNET TELEPHONY* editors.
