## Media Brief

### **Eaton 9130 UPS Honored With *Network Products Guide* Product Innovation Award**

**May 20, 2009** ... Eaton is pleased to announce that its Eaton 9130 uninterruptible power system (UPS), which advances Information Technology (IT) green initiatives, has been named a winner of the 2009 Product Innovation Award from *Network Products Guide*. Designed to provide intelligent and energy-efficient power protection, the 9130 700 to 3,000 VA models serve the needs and dynamic demands of integrated, unified communications (UC), such as instant messaging, e-mail, voice and video.

"Innovation is clearly an important factor to greater success and has the most impact on staying competitive," said Rake Narang, editor-in-chief of *Network Products Guide*. "Innovative products such as the Eaton 9130 are bringing improvements in energy efficiency to power back-up systems."

"The 9130 offers smart and cost-saving energy management combined with the highest level of power protection that today's Internet Protocol (IP) communications require. It is another step toward the greening of power without compromising power availability," said Hervé Tardy, vice president and general manager, Eaton Distributed Power Quality Business Unit. "We are very pleased to be recognized for helping IT managers advance their green initiatives with the 9130."

This annually venerated award recognizes and honors vendors from all over the world with innovative and ground-breaking products that are bringing essential and incremental changes. The recipients of the Product Innovation Awards are setting the bar higher for others in all areas of IT.
