Eaton 9130 UPS Awarded A Top Product Pick By *Buildings* Magazine

July 7, 2009 ... Eaton is pleased to announce that its Eaton 9130 uninterruptible power system (UPS), which is designed to provide intelligent and energy-efficient power protection for rack and tower servers, VoIP equipment and more, has been recognized as one of the Top 100 Products by *Buildings* magazine. The high-efficiency design of the 700 to 3,000 VA models preserves uptime while saving energy, allowing for reliable power that positively affects the bottom line.

Products were chosen by *Buildings*' editors based on innovation, functionality, efficiency and environmental friendliness. "This UPS with high-efficiency mode offers green power without sacrificing reliability," commented the editors on the reason the Eaton 9130 was picked.

"We are very pleased that the 9130 has been recognized as an essential power product and a cost-effective way to advance sustainable initiatives," said Hervé Tardy, vice president and general manager, Eaton Distributed Power Quality Business Unit. "The 9130 offers intelligent energy management combined with the highest level of power protection that today's mission-critical facilities require."

"This awards program honors exceptional products that provide solutions to the problems our readers face," said Leah Garris, *Buildings*' managing editor. "From a collection of more than 750 products, we narrowed in on 100 outstanding products to recognize."

Buildings is a 100-year old publication read by more than 73,000 commercial building owners and professional facilities managers. Its readers are responsible for nearly 4.5 million commercial and institutional buildings nationwide.
