

## **Eaton 9130 UPS Wins The 2008 Communications Solutions Product Of The Year Award**

**July 16, 2009**... Eaton is proud to announce that its Eaton 9130 uninterruptible power system (UPS) has received the 2008 Communications Solutions Product of the Year Award. The 700 to 3000 VA UPS models are designed to operate at greater than 95 percent efficiency while delivering clean and continuous power, protecting critical equipment from power anomalies.

“Eaton has proven that they are committed to quality and excellence in solutions that benefit the customer experience as well as ROI for the companies that use them,” said Rich Tehrani, TMC president and group editor-in-chief. “I am pleased to honor their hard work and accomplishments and look forward to more innovative solutions from them in the future.”

“The Eaton 9130 delivers uncompromising reliability through an exceptionally efficient design,” said Hervé Tardy, vice president and general manager, Eaton Distributed Power Quality Business Unit. “It is one of the most energy-intelligent UPSs on the market today; offering both cost-saving energy management and the highest level of power protection that today’s Internet Protocol (IP) communications require. We are honored by this recognition.”

The Communications Solutions Product of the Year Award recognizes the vision, leadership and attention to detail that are hallmarks of the prestigious award. The most innovative products and services brought to market in 2008 were selected for this year’s award. The 9130 has also achieved top honors in *INTERNET TELELPHONY’S* Annual Product of the Year competition and *Network Products Guide* Product Innovation competition.
