## **Eaton Adds New Eaton 5130 Product Line Models to Address Strong Market Demand**

**RALEIGH, N.C.** ... Diversified industrial manufacturer Eaton Corporation today announced that, due to the popular demand of the Eaton 5130 uninterruptible power system (UPS), it is expanding the product line to include new 1000, 1500 and 2200 VA models. These line-interactive models are specifically designed for protecting information technology (IT) systems, as well as Voice over Internet Protocol (VoIP) and EDGE/3G/WiMAX wireless networking equipment, against damaging power fluctuations and outages.

With the addition of the new models, the 5130, which is sold with a three-year limited warranty, helps to meet the growing need in the marketplace for affordable yet feature-rich power protection. Furthermore, the new 1000 VA model delivers a true 1000 watts of power compared to competitive systems that typically offer only 700 watts. With reduced heat dissipation in dense rack environments, the two-in-one rack and tower configurations are available in slim 2U (3.50 inches) and 3U (5.25 inches) reduced-depth form factors.

“The popularity of the feature-rich 5130 models led our design teams to add these new models to address the growing needs of the market,” said Hervé Tardy, vice president and general manager, Eaton’s Distributed Power Solutions Business Unit. “IT managers and resellers especially appreciate the UPSs’ comprehensive features that are normally found in more expensive systems. The 5130 family is one of the most sophisticated line-interactive UPSs on the market today.”

Operating at up to 94 percent efficiency, the 5130’s high-efficiency design reduces heat, thereby decreasing expensive cooling costs. Moreover, with power factors always higher than 0.9, the 5130 delivers more wattage in less space to protect more equipment and leave more room to expand IT systems.

Additional features of the 5130 include:

- Hot-swappable internal batteries – Users can easily swap out batteries without interruption of power; slim 2U external battery modules can be quickly added to provide hours of backup time.
- Intuitive power management software – Eaton’s Intelligent Power® Manager provides visibility over all of the UPSs and power distribution units (PDUs), regardless of their brand, using an intuitive, graphical interface and Simple Network Management Protocol (SNMP).
- NetWatch 5.0 software – Conducts automatic shutdown of UPS-protected devices and is compatible with the latest virtualization environment such as VMware’s ESXi and vSphere 4.0 or Microsoft Hyper-V.
- Load segments – Users can independently control output receptacles to selectively shed loads during an outage and save battery runtime, remotely reboot systems or manage sequential start-ups and conserve energy by switching-off idle devices.
- Options – Extended battery modules, Web/SNMP cards, a hot-swap maintenance bypass switch, rackmount PDUs and extended warranty plans are available.

The three new 5130 models are available now and are sold with a three-year limited warranty.

Eaton’s electrical business is a global leader in electrical control, power distribution, uninterruptible power supply and industrial automation products and services. Eaton’s global electrical brands, including Cutler-Hammer®, MGE Office Protection Systems™, Powerware®, Holec®, MEM®, Santak and Moeller, provide customer-driven PowerChain Management® solutions to serve the power system needs of the industrial, institutional, government, utility, commercial, residential, IT, mission critical and OEM markets worldwide.

Eaton Corporation is a diversified power management company with 2008 sales of \$15.4 billion. Eaton is a global technology leader in electrical components and systems for power quality, distribution and control; hydraulics components, systems and services for industrial and mobile equipment; aerospace fuel, hydraulics and pneumatic systems for commercial and military use; and truck and automotive drivetrain and powertrain systems for performance, fuel economy and safety. Eaton has approximately 70,000 employees and sells

products to customers in more than 150 countries. For more information, visit [www.eaton.com](http://www.eaton.com).
