10/100Mb BestLink SNMP/WEB Firmware Enhancement History

Applies only to part number IPK-0318 that has firmware v5.00 (the initial version of firmware for this product).

Version 5.02 (November 2004)

- SMTP-based Email Notification configuration has been enhanced to allow for easier configuration when the SMTP server being used requires the user to login.

Version 5.00

- Initial release of firmware for the 10/100Mb hardware. Contained all the features and functionality of the v4.32 release of firmware for the original 10Mb adapters that are no longer in production.
