## **EATON'S NEW POWERWARE 9155 IS UPS TECHNOLOGY AT ITS BEST**

**Feb 28 2007, HELSINKI, FINLAND...**Diversified industrial manufacturer Eaton Corporation (NYSE:ETN) has today unveiled the Powerware 9155, a new double-conversion online 20 – 30 kVA uninterruptible power system (UPS).

With capability to parallel up to four units with Eaton's flagship hot sync technology, the Powerware 9155 widens the selection of one phase output products for customers who require high power on one phase momentarily or continuously.

According to Anssi Lehmusvaara, Eaton Product Marketing Manager, " The new 9155 provides Eaton customers ultimate protection from all nine of the most common power problems facing businesses today through a product which is great value for money and technologically superior to other products in this range."

The new Powerware 9155 also provides state-of-art 0,9 power factor, offers a unique multi-lingual LCD display, a wide range of connectivity options to make power management easy for IT and facility managers, long runtimes with it's internal battery feature and comes with a small footprint.

“Not to mention, it’s 93 per cent efficiency rate, internal bypass switch, local language support and of course it’s active input power factor control,” explains Anssi Lehmusvaara, Eaton. “Making it an outstanding choice for maximising systems and the number one preference for network managers throughout the world.”

Lehmusvaara adds “The new 9155 incorporates all the key features that has made Eaton the market share leader in UPSs over 5kVA globally, such as Hot Sync for highly reliable paralleling, Advanced Battery Management (ABM®) to significantly increase battery life, and complete software and connectivity options for ease of management.”

The new 9155 is available in Europe, the Middle East, and Africa February 28, 2007.

Eaton’s electrical business is a global leader in electrical control, power distribution, and industrial automation products and services. Through advanced product development, world-class manufacturing methods, and global engineering services and support, Eaton’s electrical business provides customer-driven solutions under brand names such as Cutler-Hammer®, Powerware®, Durant®, Heinemann®, Holec® and MEM®, which globally serve the changing needs of the industrial, utility, light commercial, residential, and OEM markets. For more information, visit [www.EatonElectrical.com](http://www.EatonElectrical.com).

Powerware-branded products include a full line of AC and DC power systems, power management software, remote monitoring, turnkey integration services and site support, providing a seamless solution for high nine availability in local and wide area networking, data and voice over IP, co-location facilities, fixed-line and wireless communication networks, and industrial manufacturing.

Eaton Corporation is a diversified industrial manufacturer with 2006 sales of \$12.4 billion. Eaton is a global leader in electrical systems and components for power quality, distribution and control; fluid power systems and services for industrial, mobile and aircraft equipment; intelligent truck drivetrain systems for safety and fuel economy; and automotive engine air management systems, powertrain solutions and specialty controls for performance, fuel economy and safety.

Eaton has 60,000 employees and sells products to customers in more than 125 countries. For more information, visit [www.eaton.com](http://www.eaton.com).
